

ANFA PRIME HOSPITAL: AKDITAL'S NEW FLAGSHIP, DEDICATED TO A MODEL OF EXCELLENCE AND PROXIMITY CARE

Casablanca, April 27, 2026

AKDITAL Group, the leader in private healthcare in the Kingdom, marks a major milestone in its expansion with the inauguration of Anfa Prime Hospital. Much more than a capacity extension, this third-generation facility, located on Boulevard Ghandi in Casablanca, becomes the standard-bearer of a renewed ambition: to combine high medical technicality with a seamless and personalized care experience.

CONSOLIDATING HEALTHCARE OFFERINGS: NEW TECHNICAL SUPPORT FOR THE CASABLANCA METROPOLIS

Anfa Prime Hospital reinforces Casablanca's healthcare network by providing complementary patient care capacity. This next-generation facility has been structured to meet proximity needs, providing advanced technical resources and a hospital infrastructure that complies with international safety standards.

The objective of this new unit is to promote seamless patient care pathways through an integrated organization. By joining the city's network of healthcare facilities, Anfa Prime Hospital reaffirms AKDITAL Group's commitment to mobilizing its medical and organizational expertise to serve the community. This opening reflects a willingness to collaborate with the entire healthcare ecosystem to ensure constant availability and quality of care for all patients.

HEALTHCARE ENGINEERING AT THE FOREFRONT OF INNOVATION

ANFA PRIME Hospital deploys a 191-bed infrastructure, designed to handle the most complex cases with absolute precision. The facility houses a state-of-the-art technical platform, a true regional benchmark, including :

- **Surgical and critical care excellence:** 14 operating rooms equipped with cutting-edge technologies, including robotic surgery, supported by a 21-cubicle resuscitation unit (7 of which are dedicated to neonatology) and 54 intensive care beds.
- **A fertility and reproduction division:** A dedicated circuit comprising 29 maternity beds and the ANFA PRIME Fertility center, a pole of excellence in reproductive medicine (Assisted Reproductive Technology - ART).
- **An integrated diagnostic ecosystem:** A breakthrough imaging center (3 Tesla MRI, CT scanner, interventional radiology), a high-precision medical testing laboratory, and a 24/7 operational emergency department.

SPECIALIZED CENTERS DRIVING INTEGRATED MEDICINE

ANFA PRIME Hospital relies on dedicated centers of high medical value, structured around comprehensive and coordinated patient care.

ONCO PRIME: Entirely dedicated to the fight against cancer pathologies, this center covers the entire care pathway, from precision diagnostics to post-therapeutic follow-up. It incorporates a radiotherapy accelerator equipped with Accuray's Radixact® system, a 15-chair day-hospital chemotherapy unit, as well as specialized departments in clinical hematology and oncological intensive care.

CARDIO PRIME: A cardiovascular center of reference dedicated to heart and vascular health, this division offers a unique integrated approach. It brings together under one roof medical and interventional cardiology, rhythmology, as well as cardiovascular surgery. Equipped with two cardiac catheterization labs and a cardiac intensive care unit, CARDIO PRIME ensures optimal responsiveness and seamless continuity of care.

THE PATIENT JOURNEY: A HARMONY BETWEEN HUMAN TOUCH AND SEAMLESS CARE

The «Prime» approach goes beyond machine performance; it lies in an organization designed for the peace of mind of the patients and their loved ones. The care pathway has

been restructured to become perfectly clear and serene. The architecture of the premises, simplified wayfinding, and interdisciplinary coordination aim to reduce the perceived complexity of the hospital environment.

The «Prime Signature» offering elevates this experience by providing exclusive reception circuits and personalized accompaniment. This meticulous attention to detail and patient comfort is no longer a premium option, but a core component of the healing process, now accessible to a broader patient base.

AKDITAL: A MISSION DEDICATED TO NATIONAL DEVELOPMENT

Backed by a solid network of 44 facilities spread across 24 cities and a dedicated workforce of over 10,000 employees throughout Morocco's 12 regions, AKDITAL Group confirms its trajectory of excellence and its steadfast commitment. Listed on the Casablanca Stock Exchange in 2022, the Group proves that economic success can and must serve a major social cause: working towards Morocco's healthcare sovereignty and the well-being of its citizens. Through Anfa Prime Hospital, AKDITAL Group continues its mission as a trusted partner in national development, placing its expertise and investment capacity at the service of a high-performing healthcare system, capable of ensuring the well-being and safety of all citizens.
